

Alan Wu

Brooklyn, NY | (917) 295-0150 | yw8851@nyu.edu

Research interests: Machine learning for physical systems and robotics

EDUCATION

New York University, Tandon School of Engineering

Expected Graduation: 2029

B.S. in Electrical and Computer Engineering | Brooklyn, NY

University of Nottingham Ningbo China

Sep 2024 - Jun 2026

Undergraduate studies; transferred to NYU | GPA: 3.92/4.0, Top 5%

Selected coursework: Engineering Design and Design Project; Dynamics of Mechanical Systems; Programming and Professional Skills; Materials and Manufacturing

TECHNICAL SKILLS

Design and simulation: SolidWorks, Altair Inspire; finite element analysis and topology optimization

Programming: Python, MATLAB, Java | Tools: Git, Docker, Linux (Ubuntu)

ENGINEERING PROJECTS

UNNC Speeduck Formula Student Team

Nov 2025 - Aug 2026

- Designed a suspension upright in SolidWorks and performed finite element analysis and topology optimization in Altair Inspire to support design revisions.
- Redesigned upper and lower control arms and ball-joint connections to resolve spacer interference from the previous season that restricted suspension articulation.
- Designed a steering wheel in consultation with drivers, focusing on steering leverage, grip comfort, and ergonomics.

Loctek UoN Campus Innovation Design Competition

Jan 2026 - Apr 2026

- Led Team Modura in designing a modular bed for older adults with motorized adjustment, addressing accessibility, comfort, and space use.
- Coordinated concept development, engineering design, and the final presentation; the team won First Prize.

INTERNSHIP EXPERIENCE

Financial Services Intern | Bank of China

Jul 2025 - Sep 2025

- Performed descriptive statistical analysis of 150+ client profiles to summarize risk tolerance and asset allocation trends.

Engineering Intern | China Huaneng Group

Jul 2024 - Aug 2024

- Monitored 30+ thermal power plant parameters, including steam pressure and turbine vibration, to study boiler-generator coordination.
- Reviewed Rankine cycle performance and maintenance procedures for high-pressure feedwater pumps.

LEADERSHIP

Campus Ambassador | University of Nottingham Ningbo China

Sep 2024 - May 2026

- Served as a student liaison during senior leadership visits, including visits by business school deans from the UK and Malaysia.
- Led the Performance Appraisal Project Group and developed an evaluation framework for the ambassador team.

ADDITIONAL TRAINING

ROS 2 Introductory Bootcamp

Jun 2026 - Jul 2026

Attended lectures and demonstrations introducing ROS 2 nodes, topics, services, and coordinate frames.
