

Alan Wu

Brooklyn, NY | (917) 295-0150 | yw8851@nyu.edu

EDUCATION

New York University, Tandon School of Engineering, Brooklyn, NY Sep 2026 - Present
B.S. in Electrical and Computer Engineering

University of Nottingham, Ningbo, China Sep 2024 - Jun 2026
Coursework toward BEng in Mechanical Engineering | GPA: 3.92/4.0, Top 5% | Transferred to NYU Tandon
Relevant Coursework: Engineering Design and Design Project, Dynamics of Mechanical Systems, Programming and Professional Skills

SKILLS

Technical Skills: Python, Java, MATLAB, Docker, SolidWorks, Altair Inspire, Git, ROS2

Systems: Windows, Linux

PROJECTS

ROS 2 Robotics Bootcamp (Python, C++, ROS 2) Jun 2026 - Jul 2026

- Built and tested ROS 2 workspaces, packages, and nodes through hands-on exercises involving publishers/subscribers, services, launch files, TF2, and debugging tools.
- Reproduced and troubleshooted an existing deep-learning-based pedestrian trajectory prediction pipeline for mobile-robot navigation and collision avoidance.

UNNC Speeduck Formula Student Team (MATLAB, Solidworks, Altair Inspire, Docker) Nov 2025 - Aug 2026

- Designed the suspension upright and redesigned the upper/lower control arms and ball-joint connections, resolving spacer interference from the 2025 season that restricted suspension articulation.
- Designed a new steering wheel in consultation with drivers to increase steering leverage and improve grip comfort and ergonomics.

Loctek UoN Campus Innovation Design Competition (Solidworks, MATLAB) Jan 2026 - Apr 2026

- Led Team Modura in designing a modular multifunctional bed for elders, combining modular furniture design with motorized adjustment to improve accessibility, comfort, and space efficiency.
- Coordinated the team through concept development, engineering design, and final presentation of the product solution.
- Won First Prize in the competition.

EXPERIENCES

Financial Services Intern | Bank of China Jul 2025 - Sep 2025

- Performed descriptive statistical analysis on 150+ client profiles to identify risk tolerance and asset allocation trends.
- Explored a basic Random Forest model on client-profile data to examine patterns in client preferences and feature importance.

Engineering Intern | China Huaneng Group (Thermal Power Plant) Jul 2024 - Aug 2024

- Monitored 30+ real-time thermal parameters, including steam pressure and turbine vibration, to analyze boiler-generator coordination.
- Evaluated Rankine cycle performance and maintenance protocols for high-pressure feedwater pumps to optimize energy conversion.

LEADERSHIP & CAMPUS INVOLVEMENT

Campus Ambassador | University of Nottingham Ningbo China Sep 2024 - May 2026

- Served as the sole student liaison for senior leadership visits, including business school deans from the UK and Malaysia, presenting UNNC's founding philosophy and academic vision to international visitors.
- Led the Performance Appraisal Project Group within the organization; designed and implemented a new evaluation framework that significantly improved the operational efficiency of the ambassador team.

Video Project Lead | Zhijiang Lab Jul 2022 - Aug 2022

- Directed and edited a video showcasing the lab's latest technological breakthroughs, bridging the gap between cutting-edge research and public understanding.
